

Secure VPN for Vendors

Secure Network Access for Third Parties

ADP offers Secure VPN for those vendors who require network access to ADP dealers. Secure VPN provides vendors, with dealer approval, secure, point-to-point network connectivity to the ADP DMS.

Secure VPN is one of the Subscriber Access solutions that ADP offers as part of its comprehensive Third Party Access Program. Secure VPN leverages ADP's nationwide network to allow vendors to reach dealers without having to build and manage network connectivity themselves.

Network Access for Vendors; Security for Dealers

ADP's Secure VPN solution includes the following:

- Provides Third Party with a method to access a DMS at the user logon prompt level over the ADP support network instead of dialing in via modem. Note: This solution only available for dealers on the ADP support network, representing over 12,000 dealers.
- Provides to Dealer, on request, information on who and how often their system is accessed in this manner by each Third Party participating in the program and provide ability to shut off access when necessary.

ADP's Secure VPN solution provide benefits to both dealers and Third Parties:

- Allows vendors to use a consistent method of network access for reaching dealers
- Eliminates need for vendors to build and maintain network connectivity to dealers one at a time
- Provides an easy way for dealers to know which vendors are using Secure VPN to access their network
- Eliminates the need and cost of dial-up modems to access the DMS
- Provides a secure network solution that benefits both dealers and vendors.

For Third Parties that use the Secure VPN product, ADP allows the use of the ADP Approved VPN Connection logo. Third Parties may also use the tagline "PRODUCT connected through ADP approved VPN" where PRODUCT is the Third Party product name.

Need More Information?

For Third Parties interested in participating in ADP's Third Party Access Program please email us at thirdpartyaccess@adp.com or visit DealerSuite.com/ThirdPartyAccess. For Dealerships wanting additional information on ADP's Third Party Access Program contact us at 888-424-6342 or visit us at DealerSuite.com/ThirdPartyAccess. We encourage every dealer to define what level Third Party system and data access they expect of the Third Party provider to utilize and encourage such providers to contact ADP for more information.
