

**Leverage the latest technology...  
and always have the right  
technology to run your business  
today and in the future**

No upfront investment to purchase  
a server or network equipment

Eliminate ongoing and future costs  
associated with technology upgrades

ASP Hosting Services provides  
up-to-date software applications  
to meet the changing needs of  
your dealership

**Feel confident your data is secure...  
in state-of-the-art ADP-owned and  
operated Data Centers**

ADP doesn't outsource data  
or system management

ADP Data Centers utilize automated  
system backup, in a secure  
environmentally controlled facility

Over 30 years in the auto retail  
industry means we have the experience  
you can trust

**your single-point  
of contact for all  
your technology  
needs**

**Eliminate many costs associated with  
an on-site server...and turn to ADP  
for a completely managed solution**

Do away with ongoing system  
maintenance, data backups and  
in-dealership software upgrades

Eliminate the need for servers —  
ADP houses all the hardware for you

Eliminate system insurance, reduce  
phone lines, re-purpose storage space  
and re-direct precious capital resources

**Reduce system downtime and boost  
productivity...let ADP's ASP solution  
proactively monitor your system**

SAS-certified Data Centers provide  
disaster recovery and redundant equipment  
to reduce system downtime

Increase productivity and give your  
employees more time to focus on revenue  
generating activities by eliminating  
day-to-day maintenance and backup
